

fund **objective**

To provide long-term capital growth in excess of UK price inflation by investing in Global listed shares in a Shariah compliant manner. The fund aims to perform in line with the benchmark.

market commentary

Global equities generated positive returns, driven by substantial monetary and fiscal policy measures unveiled globally to mitigate the economic impact of the COVID-19 pandemic. News around progress on potential vaccines and treatments for the virus and easing of lockdown restrictions in several economies also provided support. However, risks of a potential second wave of infections and a rise in US-China tensions kept markets volatile. Against this global backdrop, all key regional markets ended higher, with the US and Pacific ex Japan rising significantly. Emerging markets also gained, but underperformed their developed markets peers. From a sector perspective, information technology, consumer discretionary and materials were among the leading gainers.

risk rating

Very Low Low Low/Medium Medium Medium/High High Very High

All investments carry a level of risk. You need to decide how much of each type of risk you're prepared to take. The table below gives an overview of some of the risks associated with this fund.

risk type	description of risk	level of risk for this fund
Capital Risk	This is the risk that the value of your investments will fall. The younger you are, the less worried you might be about capital risk, because your investments have time to recover their value before your retire.	High
Inflation Risk	This is the risk that the value of your investments will grow more slowly than prices rise. Inflation can be a problem for pension savings invested in cash funds particularly if the interest you're earning is less than the rate of inflation.	Med
Pension Conversion Risk	The price of an annuity changes on a regular basis. This means that the amount of income you can secure with the same amount of money will change. Pension conversion risk is the risk that the amount of income you can buy drops before you retire, because your money is invested differently to annuity funds. That's why putting more of your DC pension pot into bonds to try to match annuity prices as you get closer to retirement age can help protect against this risk.	High

About the factsheet

It is important to remember that the price of units can go down as well as up. There's no guarantee that you'll get back the amount that goes into your DC pension pot. Changes in rates of currency exchange, particularly where overseas securities are held, could also affect the value of your investment.

Although the funds can typically be bought and sold on a daily basis, if an exceptional amount of withdrawals are requested, the fund manager may need to delay when you can access your holdings. All funds are provided through FIL Life Insurance Ltd and may invest in securities issued by or hold deposits with HSBC Holdings plc and associated companies.

The Trustee can change the underlying managers or funds at any time without member consent or prior notification.

Valuation time: Business days at 5:00pm (UK time)

Dealing Process: The cut off time for switch instructions is 2:00pm each business day.

Charges

HSBC pays the investment management charges – not you. However, there may be costs within some of the funds and these will be reflected in the unit price. These nominal costs are variable and are likely to be between nil and 0.2% a year.
