

the DC funds

Japanese Equities - **passive**
as at 31 December 2019

fund objective

To provide long-term capital growth in excess of UK price inflation by investing predominantly in Japanese listed shares. The fund aims to perform in line with the benchmark as closely as possible.

Past performance isn't a guide to future performance. The figures are shown in sterling and have been calculated using actual returns since the introduction of the current DC fund range.

Source: Morningstar, FIL Life Insurance Ltd. Single priced (i.e. no bid/offer spread), gross income reinvested and gross of fees. Indicative prices have been used if a portfolio valuation fell on a non-trading day. The fund was launched on 1st March 2018, but links to an underlying fund which has been existence for a number of years. Before 1st March 2018, performance is simulated based on data provided by Legal and General, the underlying fund provider. Thereafter, returns are produced by Fidelity on a monthly basis.

market commentary

Japanese stocks advanced in the October–December period, with key equity indices recording their strongest quarterly gains since 2016. Signs of easing tensions between the US and China, and a weaker yen helped to lift stocks. Strength in US economic indicators and record highs for US equity indices also provided support. At a sector level, health care, technology and communications registered the strongest gains. Real estate and utilities were conspicuous laggards amid a gradual uptrend in interest rates. In terms of corporate earnings, the fiscal 2019 interim results season (April–September 2019) for TOPIX-listed companies revealed a 1% gain in sales and an 8% decline in operating profits. Second quarter results for FY19 showed an improvement in profit growth (excluding extraordinary items) versus the previous quarter, and a recovery in the revision index was consistent with a bottoming out in corporate earnings.

risk rating

Very Low Low Low/Medium Medium Medium/High High Very High

All investments carry a level of risk. You need to decide how much of each type of risk you're prepared to take. The table below gives an overview of some of the risks associated with this fund.

risk type	description of risk	level of risk for this fund
Capital Risk	This is the risk that the value of your investments will fall. The younger you are, the less worried you might be about capital risk, because your investments have time to recover their value before your retire.	High
Inflation Risk	This is the risk that the value of your investments will grow more slowly than prices rise. Inflation can be a problem for pension savings invested in cash funds particularly if the interest you're earning is less than the rate of inflation.	Med
Pension Conversion Risk	The price of an annuity changes on a regular basis. This means that the amount of income you can secure with the same amount of money will change. Pension conversion risk is the risk that the amount of income you can buy drops before you retire, because your money is invested differently to annuity funds. That's why putting more of your DC pension pot into bonds to try to match annuity prices as you get closer to retirement age can help protect against this risk.	High

About the factsheet

It is important to remember that the price of units can go down as well as up. There's no guarantee that you'll get back the amount that goes into your DC pension pot. Changes in rates of currency exchange, particularly where overseas securities are held, could also affect the value of your investment. Although the funds can typically be bought and sold on a daily basis, if an exceptional amount of withdrawals are requested, the fund manager may need to delay when you can access your holdings. All funds are provided through FIL Life Insurance Ltd and may invest in securities issued by or hold deposits with HSBC Holdings plc and associated companies. The Trustee can change the underlying managers or funds at any time without member consent or prior notification.

Valuation time: Business days at 5:00pm (UK time)

Dealing Process: The cut off time for switch instructions is 2:00pm each business day.
